Just two minor questions:

Line 118: Since this is a retrospective study and the mean follow-up time was 24.51 months, why the authors stated the SE change at 6 months postop.? Maybe it is the last follow-up time.

The manuscript needs comprehensive language editing. For example: Line 327-328:"The ideal size of capsular opening is around 4.0mm to 5.0mm, which should be at least 1.0mm or 2.0mm (white arrows) smaller than the optic diameter but not too small".

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
I am able to assess the statistics
