Reviewer’s report

Title: Capture of Intraocular Lens Optic by Residual Capsular Opening in Secondary Implantation: Long-term follow-up

Version: 1 Date: 21 Jan 2018

Reviewer: Xingwu Zhong

Reviewer's report:

The author described a novel method for the secondary intraocular lens implantation, however I thought the control group should be added, this new method seems more difficult than traditional ways and it need more surgical technique, I was concern that how do you ensure that the posterior capsular hole in all cases are same size. Besides did all patients receive the same lens?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
