Reviewer's report

Title: Theme trends and knowledge structure on choroidal neovascularization: a quantitative and co-word analysis

Version: 0 Date: 10 Oct 2017

Reviewer: Taichi Hikichi

Reviewer's report:

This interesting study is the first paper to systematically examine the fundamental knowledge structure and theme trends on choroidal neovascularization (CNV). This study integrated the strategic diagram and SNA based on the co-word analysis of MeSH terms on CNV and found that researches on the drug therapy and pathology changes are in the core status whereas studies on metabolism and genetics are the emerging topics.

This manuscript can provide some hints for researchers in choosing the research topics.

I think the manuscript is suitable for the publication in the journal BMC Ophthalmology.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
