Title: Ocular biometric characteristics of cataract patients in western China

Version: 2 Date: 22 Dec 2017

Reviewer: Hun Lee

Reviewer's report:
1. Line 130, page 8: "whereas CA did not vary significantly with age (P < 0.001; Table 2, Fig. 4)."
   "Please recheck this. In table 2, it seems that CA did vary significantly with age (P < 0.001).

2. Line 234, page 13: "CA did not increase with age as other studies". Please recheck this.

3. Line 253-255, page 14: "The negative correlation with K may reflect a tendency of shorter eyes to have steeper corneas and flatter corneas than longer eyes". Please recheck this. A bit of confusion. I suggest that "The negative correlation with K may reflect a tendency of shorter eyes to have steeper corneas and longer eyes to have flatter corneas.”

4. In figure 2,3, and 4, please provide results for total eyes (male and female), if possible.
