Reviewer’s report

Title: Suprachoroidal Hemorrhage Followed by Swept-Source Optical Coherence Tomography: A Case Report

Version: 0 Date: 03 Jun 2018

Reviewer: M. A. Rehman Siddiqui

Reviewer’s report:

The authors describe a novel use of SS-OCT to identify the location of Supra-choroidal hemorrhage and subsequently follow up resolution of the condition.

I feel this could be better described as a pictorial essay or a short letter to the editor. Author should discuss more about differential diagnosis of such lesions on SS-OCT. Discussion about supra-choroidal haemorrhage itself is unnecessary.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
