Reviewer’s report

Title: Clinical Characteristics and Prognostic Factors of Posterior Segment Intraocular Foreign Body in a tertiary hospital

Version: 0 Date: 04 Dec 2018

Reviewer: Dilip Kumar Mishra

Reviewer’s report:

1. Study is well design, but authors have not included a single photograph of clinical or radiological findings.

2. In table 2, nature of foreign body authors have to categorize magnetic and non-magnetic IOFB, as Iron wire is also magnetic metal.

3. Table 3 is not clear as authors wrote penetrating site and clinical presentation in same table. My suggestion is they have to make separate table for clinical presentation and site.

4. Vitreous hemorrhage is alone present or present with other injury?

5. What management was done in single case of siderosis bulbi?
