Reviewer’s report

Title: Comparison of visual quality after EVO-ICL implantation and SMILE to select the appropriate surgical method for high myopia

Version: 1 Date: 20 May 2018

Reviewer: Adel Ebraheem

Reviewer's report:

Dear Dr. Huang,

I would like to thank you for allowing us to review your manuscript. However, we are skeptical about your conclusion.

You mentioned in the operation procedure and follow-up period section that The laser photocoagulation treatment was administered for severe retinal degeneration or a torn hole; we think you should include those cases in the exclusion criteria because these conditions might affect the ocular scatter and vision quality.

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
