Reviewer’s report

Title: Human herpesvirus-6 corneal endothelitis after intravitreal injection of ranibizumab

Version: 0 Date: 22 Jun 2018

Reviewer: Adel Ebraheem

Reviewer’s report:

Dear Dr. Ishida,

I would like to thank you for submitting this interesting case. However, we have some questions about your case report

1) For how long the patient was on steroid treatment?

2) Could you share with us more about his/her medical history such as if he/she was diabetic?

3) As you know, steroid might increase the risk of herpes infection; we would like to know if the patient was on steroid when he/she got herpes infection. If he/she stopped the steroid, when did he stopped taking steroid?

4) in the abstract,(line 38) there is a mistake about the reported visual acuity.

Thank you!

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
