Reviewer’s report

Title: Differential expression of connective tissue growth factor and hepatocyte growth factor in the vitreous of patients with high myopia versus vitreomacular interface disease

Version: 0 Date: 02 Dec 2018

Reviewer: Winfried Amoaku

Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

The Methods section has a statement on 'patients being further divided into 4 subgroups. This is confusing in the present form, which could imply sub-grouping of each of high myopia, and VMID into 4! I believe what the authors mean is subdividing each of the 2 groups further into 2 subgroups? The statement needs to be revised appropriately throughout the manuscript.

There is a fair bit of repetition (verbatim) of the Introduction section (lines 64-81) under Discussion. This needs to be rectified.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
Please indicate the quality of language in the manuscript:
