Reviewer’s report

Title: Retinal and Choroidal Thickness in Paediatric Patients with Hypoalbuminaemia Caused by Nephrotic Syndrome

Version: 0 Date: 21 Oct 2018

Reviewer: Seungsoo Rho

Reviewer's report:

This is a well written manuscript related to a way of Ologen application on glaucoma surgical technique. Overall, the design is simple and the result is relatively concrete.

I only wonder how long the Ologen material implanted under the scleral flap was maintained during the follow-up. There are some data that Ologen doesn't exist more than 1 or 2 months postoperatively. Also the model number (e.g. 87... or 86...) should be stated in the method section. And if the authors have any imaging data like AS-OCT or UBM, it should be clarified.

And as all the subjects were received cataract surgery, the masking effect on IOP decrease should be mentioned in discussion section.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
