Reviewer’s report

Title: Retinal and Choroidal Thickness in Paediatric Patients with Hypoalbuminaemia Caused by Nephrotic Syndrome

Version: 0  Date: 19 Nov 2018

Reviewer: Judy Savige

Reviewer's report:

I thought this paper was worthwhile.

However could the authors please reduce the number of abbreviations?

Were the controls coded? were they age-matched? what other variables affected width - was age one of them? is it appropriate to use 2 decimal figures for the thickness? when the location is less precisely measured??

I was surprised by the definition provided of nephrotic syndrome - and we often use nephrotic range proteinuria now - because in general the nephrotic syndrome is seen less often... usually we just note the albumin level rather than total protein - do the authors think this is incorrect now with their data?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
