Reviewer’s report

Title: Comparing Habitual and i.Scription Refractions

Version: 1 Date: 04 Dec 2018

Reviewer: Ilana B. Friedman

Reviewer's report:

The authors are to be congratulated on their manuscript. While there were many issues that the previous reviewers pointed out, the authors did an excellent job of addressing them within the limitations of the study. The paper does suffer a little bit from highly technical language and statistical discussion which make it a little difficult for the reader to get through. In addition, the sample size was very small and it is unclear whether there is sufficient power to draw the conclusions that the authors make. This also makes subgroup analysis questionable.

Lastly, the question still remains whether it is possible and easily accessible for people to obtain glasses that would correlate with the iscription refractions. A comment regarding how the refractions translate to real world prescriptions would be helpful to the reader.

Are the methods appropriate and well described?

If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?

If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?

If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?

If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English

Please indicate the quality of language in the manuscript:

Declaration of competing interests

Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?
2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?
3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?
4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?
5. Do you have any other financial competing interests?
6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests
