Reviewer’s report

Title: Bisphosphonate-Induced Orbital Inflammation in a Patient on Chronic Immunosuppressive Therapy

Version: 0 Date: 31 Dec 2018

Reviewer: Alejandro Fonollosa Calduch

Reviewer’s report:

This is a concise but interesting case of orbital inflammation after treatment with bisphosphonate. I have just one comment:

The authors should add in the case presentation or in the discussion section that Orbital inflammation due to systemic lupus erythematosus (though a rare condition) should be included in the differential diagnosis of this case.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
