Reviewer’s report

Title: Choroidal neovascularization emerged right from the focal choroidal excavation in eyes with central serous chorioretinopathy post half-dose photodynamic therapy: A case report

Version: 3 Date: 20 Feb 2019

Reviewer: Michael Paul Blair

Reviewer's report:

The manuscript describes 2 cases of CNV after PDR for CSCR in the setting of focal choroidal excavation. Given that the N is 2 no strong conclusions can be drawn, but it is of interest and treaters should be aware to consider this phenomenon.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
