Title: Granular cell tumor presenting as an intraocular mass: a case report

Version: 0 Date: 04 Jan 2019

Reviewer: Seong Joon Ahn

Reviewer's report:

- Line 51, 53, 118: grammatically incorrect sentences. There are several grammatical errors throughout the manuscript. The English language in your text would benefit from improvement for grammar, clarity and readability. We recommend that you either ask a colleague whose native language is English to review your manuscript or that you use one of the many English language editing services available.

- Line 52: I believe that sensory exotropia may be the better term.

- Was there any change in tumor size or associated conditions during the 9-month period between the vitreous biopsy and vitrectomy with tumor resection? Why did they have 9-month period until tumor resection?

- Could you provide a gross image of the surgical specimen obtained by tumor resection?

- The authors stated that intraocular GCT should be kept in mind and considered in clinical practice. Please specify who should be considered for GCT.
