Reviewer’s report

Title: Impairment of visual acuity and retinal morphology following resolved chronic central serous chorioretinopathy

Version: 1 Date: 31 Mar 2019

Reviewer: David Pelayes

Reviewer's report:

congratulations very nice work .The central chronic serous chorioretinopathy is an infrecuent disease and represents a therapeutic challenge for all specialists. this paper has a very good number of cases and the new therapeutics tools like a subtreshold laser could be important in the future.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
