Review
Functional and morphological retinal impairment following resolved chronic central serous chorioretinopathy

The manuscript is very well organized and written. Please find some comments to your work.
1. Title: you describe the group of the patients treated with SMPLT and compare with non-treated group with CSCR. It would be wise to reflect it in your title, as resolution of CSCR can be spontaneous. Additionally, functional results have wider meaning than visual acuity, that you describe in your study. For example: Comparison of visual acuity and morphologic retinal impairment in patients with CSCR treated with SMPLT and non-treated.. Consider this comment.
2. Abstract: Materials and methods: describe the group shortly (age, gender).
3. Abstract Results: with OCTA one can assess the condition of the choroidal vasculature or absence of choroidal vasculature, but not directly the perfusion. For that you need ICG or oximetry. Perfusion Please modify in main text.
4. Main Text: Methods: describe the gender distribution in all tables as it is important for CSCR.
5. spectral optical coherence tomography (SOCT) - you mean spectral domain OCT? it is usually shortened to SD-OCT. Please change.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:

Not suitable for publication unless extensively edited

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
I declare that I have no competing interests.
