Reviewer’s report

Title: Choroidal Structural Changes Correlate with Severity of Diabetic Retinopathy in Diabetes Mellitus

Version: 1 Date: 24 Apr 2019

Reviewer: Joana Tavares Ferreira

Reviewer's report:

A study with high clinical relevance, however with some statistical failures. A multivariate analysis was not performed that should be included when we talk about choroidal thickness because several factors influence it. On the other hand we do not know if we have patients with clinical or subclinical diabetic macular edema. There are some more recent papers in the literature that were not mentioned.

Are the methods appropriate and well described? 
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls? 
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown? 
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review? 
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
