Reviewer’s report

Title: Solar Maculopathy: Prognosis Over One Year Follow Up

Version: 1 Date: 07 Mar 2019

Reviewer: Mohammad hossein Jabbrpoor bonyadi

Reviewer's report:

I read the manuscript entitled "Solar Maculopathy: Prognosis Over One Year Follow Up". Here are my comments regarding this work.

1-Manuscript writing needs re-edition. For example ..of photoreceptor inner and outer segments in 100% of our cases while in the study of (AULT [11] showed) that Optical coherence tomography demonstrated foveal atrophy associated 

Actually, the occurrence of the inner retinal disruption in previous studies mostly due to (choric) solar maculopathy

2-It is shown that there is direct relation between outer retinal layer condition in OCT and visual prognosis in different retinal disease. Here in this study 90% of samples have follow-up VA of better than0.8 while OCT revealed an outer retinal layer hole in majority (80%) of cases at last follow-up. This controversy must be discussed in the manuscript.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
