Reviewer's report

Title: Ipsilateral transient amaurosis, mydriasis and light reflex absence after subconjunctival local anesthesia with mepivacaine in three patients with refractory glaucoma – a case report

Version: 0 Date: 29 Jul 2019

Reviewer: Naim Terai

Reviewer's report:

Interesting case series with clinical relevance.

Here are some minor issues:

- Abstract: The following sentence is incomplete: `The ipsilateral ciliary ganglion .. may be the responsible mechanism for....?`

- Please explain abbreviation of CPC in introduction section.

- Throughout the manuscript the language needs some revision, e.g:

  The sentence `A visual acuity of nulla lux,.... Please rephrase nulla lux to `no light perception`

Discussion, p. 6, 34-39: `These three cases are remarkable not only..... Please rephrase this sentence.

- The figures do not appear to be relevant for the understanding of the case series.
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
