Reviewer’s report

Title: Inherited FGFR2 mutation in a Chinese patient with Crouzon syndrome and luxation of bulbus oculi provoked by trauma: A case report

Version: 0 Date: 21 Jul 2019

Reviewer: F Hariri

Reviewer's report:

Specific comments:

1) The title indicating clinical report, but the manuscript has more genetic content.

2) It is well written but requires minor grammatical correction or information rephrasing. Example; in abstract (introduction and conclusion) and main manuscript (introduction and discussion) contains 2 sentences which are contradicting to each other;

   * Page 2 line 30 and Page 3 line 20: Crouzon syndrome (CS) is one of the causes of fibroblast growth factor receptor 2 mutations.

   * Page 3 line 1 and Page 5 line 29: Crouzon syndrome is caused by FGFR2 mutations.

3) The term 'a surprised look' (Page 4 line 24) can be described as 'proptosed' or at least written with quotation mark (‘…’)

4) Please state the mannitol, tobramycin eye ointment and carbomer eye drops full prescription protocol.

5) The author should mention treatment duration and follow up period for the patient.

6) The discussion section contains clinical and genetic aspects of Crouzon syndrome. What does the author mean by stating 'our results indicate a rare symptom in this disease' (Page 6 line 15)? This should be well elaborated.

General comments:

1) This case report has both clinical and genetic strength if it can be structured systematically.

2) Figures are well presented.
Recommendation:
Accept with revision

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript
Quality of written English

Please indicate the quality of language in the manuscript:

Needs some language corrections before being published

Declaration of competing interests

Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?
2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?
3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?
4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?
5. Do you have any other financial competing interests?
6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below.

If your reply is yes to any, please give details below.
