Reviewer’s report

Title: A review on the epidemiology of myopia in school children worldwide

Version: 0 Date: 15 Jun 2019

Reviewer: Jason Cheuk-Sing Yam

Reviewer's report:

This is a comprehensive review on the epidemiology of school myopia with lots of information. While the data is important and interesting, the author may need to highlight the new findings and focus of the whole paper. Rather than just presenting all data in a systematic review way, more detailed explanations on the observed difference, together with the potential reasons for the risk factors are all relevant to understand this topic.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
