Reviewer’s report

Title: Angiographic Features of Drug-Induced Bilateral Angle Closure and Transient Myopia with Ciliochoroidal Effusion

Version: 1 Date: 16 Jul 2019

Reviewer: Jaeryung Oh

Reviewer's report:

In this interesting study, authors presented angiographic features of drug-induced angle closure. I have only a few comment. The definition of major or minor sign could be moved to Method instead in Result. And if it had, please add the references for the classification of major or minor.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
