Reviewer’s report

Title: Comparison of glaucoma diagnostic ability of ganglion cell-inner plexiform layer according to the range around the fovea

Version: 1 Date: 03 Nov 2019

Reviewer: Enrico Martini

Reviewer's report:

I think the paper is now suitable for publication. I think some further effort should be done to ameliorate the english language. I think that the sentence when you state that with declining GCIPL thickness the diagnostic ability increases should be reviewed to avoid confusion. Therefore there are no substantial obstacles to publication.
