Please overwrite this text when adding your comments to the authors. I consider this study to have valuable data that would be of interest if published. However, it needs a minor revision before further consideration. I did not find inclusion and exclusion criteria for subjects enrolled into the study and it needs to be improved. On the other hand, I would suggest any additional statistic analyze (OR) for factors associated with the treatment results. I do not feel to judge the English use and grammar but the whole text should be revised by a Native Speaker.
