Reviewer’s report

Title: Preoperative clinical factors and visual outcomes following orbital decompression with dysthyroid optic neuropathy

Version: 2 Date: 08 Dec 2019

Reviewer: Deniz Ilhan

Reviewer's report:

Dear Authors,

The article entitled "Preoperative clinical factors and visual outcomes following orbital decompression with dysthyroid optic neuropathy - BOPH-D-19-00750R2” is quite informative and showed valuable results about risk factors about DON antity.

However, there are some datas need to be shown as follows:

*What is the average measurement of Hertel in each group?
*Is there any patients with high IOP secondary to Thyroid Eye Disease?
*How many patients got thyroidectomy and/or RAI therapy?
*What is the profile of the patients' Thyroid Antibodies?

Discussion should be enlarged after the new datas.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
