Title: Multimodal imaging in a case of a congenital retinal macrovessel associated with a retinal cavernous hemangioma: a case report

Version: 0 Date: 14 Jul 2019

Reviewer: Neha Goel

Reviewer's report:

The authors present an interesting case of a rare association.

The abstract is too long and needs to be shortened.

Similarly the discussion should pertain to the case being described and not be a review of the literature. It needs to be rewritten completely in a more precise and crisp manner.

Are the images of the macular haemorrhage which occurred on follow up available? If so, they should be added to add credence to the report

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
