Reviewer's report

Title: Severe Persistent Unremitting Dermatitis, Chronic Diarrhea and Hypoalbuminemia in a Child; Hartnup Disease in Setting of Celiac Disease

Version: 5 Date: 4 November 2014

Reviewer: Sergio Amarri

Reviewer's report:

The authors report a well written and interesting case on quite unusual case on Hartnup disease in a patient with celiac disease.

I suggest to review references, that contains a few mistypings, and to not insert them into the abstract but only into the main text

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
