Reviewer’s report

Title: Optimising motor learning in infants at high risk of cerebral palsy: a pilot study

Version: 3  Date: 22 February 2015

Reviewer: Antonia A Gómez Conesa

Reviewer’s report:

The authors have made changes to the manuscript that improve the quality of it and allow its publication. The discussion has been structured and have been answered all inquiries. There are required Minor Essential Revisions:

Line 519: “Wang et al (2006) suggested a change of more than 9 raw score points on the PDMS -2 may be clinically significant18 amongst toddlers”. Please to correct the reference according to BMC Pediatrics style.

Figure 1. Please, to place the title below the figure.

Table 2. Please, to place the phrase “* Indicates statistically significant” below the table.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
