Reviewer's report

**Title:** Absence of inferior vena cava in 14-year old boy associated with deep venous thrombosis and positive Mycoplasma pneumoniae serum antibodies- a case report.

**Version:** 2  
**Date:** 2 June 2014

**Reviewer:** thomas Abramo

**Reviewer's report:**

For a case report for this particular effective agent and its complications very little revision needs to be done for this paper. The authors have been concise, linear and descriptive the case report. I feel no further information is really needed from this paper.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I have no competing interests in this paper that the authors have written. The authors have been very explicit and defining the financials relationship to this paper which is none. They have also been very explicit in defining what the authors have done for the paper.
