Reviewer's report

Title: Still births, neonatal deaths and neonatal near miss cases attributable to severe obstetric complications: a prospective cohort study in two referral hospitals in Uganda

Version: 1 Date: 6 February 2015

Reviewer: Anup Katheria

Reviewer's report:

Major Compulsory Revision
The last two paragraphs in the discussion about therapies for neonatal asphyxia and respiratory distress syndrome have nothing to do with near misses and should be removed.

Minor Revisions
Correct p values are 0.01 etc. please check where there are additional decimals.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
