Reviewer's report

Title: Association between gross motor function and postural control in sitting in children with cerebral palsy: A study of 139 children

Version: 3 Date: 13 June 2015

Reviewer: Regina Harbourne

Reviewer's report:

Major compulsory revisions: None

Minor essential revisions: On p. 6, line 15, please reword this segment of your sentence: "in order to improve the monitoring of the frequency of the PC". Frequency of what? What is the PC?

The paper is much improved in this revision, and I thank the authors for attending to all the suggestions.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
