Reviewer's report

Title: Usability evaluation with adolescents and mental health professionals to develop a web-based cognitive-behaviour therapy program for adolescents with anxiety disorders

Version: 2 Date: 25 January 2015

Reviewer: Robert D. D. Friedberg

Reviewer's report:

1. Compulsory revisions

My main recommendation is to expand the discussion section to include implications for clinical practice and future research. The results are important and could offer clear directions for practice and research. The authors should take a little more liberty to offer more elaborated and specific recommendations.

Level of interest: An exceptional article

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
