Reviewer's report

Title: Unusual presentation of Rosai-Dorfman disease in a 14-months old Italian child: a case report and review of the literature

Version: 4 Date: 27 December 2015

Reviewer: Evan Propst

Reviewer's report:

Minor essential revisions
1. (Line 96) Change parotid cavity to parotid gland.
2. (Line 118) Change 20 to Twenty as it is the beginning of the sentence.
3. (Line 135) Change Leukaemia to Leukemia.
4. (Line 147) Change lymph node station to group of lymph nodes.
5. (Line 241) Change 11 to Eleven as it is at the beginning of the sentence.
6. (Line 259) Change consisted in to consisted of.
7. (Line 270) Change "In the light of" to "in light of"
8. Tables need editing and to be cleaned up..especially Table 3.
9. The Chi-square analysis does not seem to be that useful, seeing as "any therapy" encompassed everything from steroids which is fairly benign to chemotherapy.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
