Reviewer’s report

Title: Quality of life and trust among young people with narcolepsy and their families, after the Pandemrix® vaccination: protocol for a case-control study

Version: 1 Date: 06 Jun 2017

Reviewer: Osman Farooq

Reviewer's report:

The authors have done a wonderful job in planning this study. This manuscript is well written and clearly describes the intention to perform a relevant and important project. My only query is that the structure of individual paragraphs could be better constructed to avoid a jumble of words and ideas. The BACKGROUND section is particularly long and has cumbersome paragraphs. Perhaps the authors could shorten this section, or divide it into subsections. The paragraphs within this section should also be restructured to avoid long and wordy.

I look forward to reading results from this study once the project is completed.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
