Reviewer's report

Title: Prevalence of attention-deficit/hyperactivity disorder symptoms and their associations with sleep schedules and sleep-related problems among preschoolers in Mainland China

Version: 1 Date: 25 Jul 2017

Reviewer: Per A Gustafsson

Reviewer's report:

The authors have addressed the major points I made and I now think the manuscript is suitable for publication from a scientific point of view.

However, there is still a need for language editing. I.e. on page 14 first paragraph under Results line 37 "… ADHD symptoms reduced with increasing of age…” should be "… with increase of age" or "… with increasing age" and same page line 42 "… were more likely to have had ADHD …” should be "… were more likely to have had ADHD …" Another example from page 19 last paragraph line 42 "… later waking time and longer bedtime…." I suppose that the authors mean later bedtime. These are just a few examples, the manuscript would improve with a thorough revision of the English language.
