Reviewer's report:

Dear Authors,

Thank you for the opportunity to review the second re-submission of this manuscript. My overall opinion is that the manuscript have satisfactory improved, and that my comments have been obeyed. Still, I have a few comments. The section Background in your Abstract would be more consistent if you lift up the sentence "The LiTTLe Program...." before you address the aim of your study. On page 10 you describe three answering alternatives, all positive and not allowing for a negative answer (like if the foci had not been promoted), I think this should be discussed in the Limitations section. The Limitations section would also be strengthen if you supported your statements with references. Finally, I also miss a reference on page 28 line 7, at the end of the sentence that ends with ", but research from other languages suggest....."

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
