Title: Myocardial Oedema in an 8-year-old Chinese Boy with Idiopathic Systemic Capillary Leak Syndrome

Version: 3 Date: 03 Jan 2019

Reviewer: Gregorio Milani

Reviewer's report:

The authors addressed my queries. English language could still be improved and I would add in the list of factors able to modify capillary permeability and detected in children with ICLS, the eosinophilic cationic protein (Milani et al. Pediatr Int. 2013, 55:81-2). Overall, I find that the article is now acceptable.
