There are multiple minor corrections to the manuscript. I have uploaded a red-lined version of the text.

This is an interesting and well-documented case report. The manuscript is long and at times verbose. I would delete the extensive or drastically reduce the descriptions of the laposcopic surgery and of the radiation therapy. It is important to note whether the pathologists saw any evidence of H. pylori in the resected tissue. Was a Warthin-Starry Stain or other specific stain for H. pylori done?
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
