Title: Distal and Lateral Subungual Onychomycosis of the Finger Nail in a Neonate: a Rare Case

Version: 1 Date: 20 Apr 2019

Reviewer: Anucha Thatrimontrichai

Reviewer's report:

Comments to the Author

I am appreciated the opportunity to review this study. This study is a case report of neonatal onychomycosis with oral thrush. I have some comments and questions.

1. Abstract: case presentation and conclusion should be more concise and explicit. Abbreviations are avoidable in the abstract.

2. Bacterial nomenclature: Organisms should be referred to by their scientific names according to the binomial system. When first mentioned the name should be spelt in full and written in italics. Afterwards the genus should be abbreviated to its initial letter, e.g. 'C. albicans' not 'C albicans'

3. Case presentation

3.1 Please add more detail of characteristics e.g. gestational age, birthweight, birthweight compared with gestational age

3.2 In the 2nd paragraph: "conscious and playful" should be use term "active"

4. Investigation: Abbreviations (SDA, CLSI, MIC, OSI and MADI-TOF) and List of Abbreviations: not need because less than 3-5 repeated words.

5. Reference: Please recheck in author lists (e.g. Reference 13, 18) and follow the instruction

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess
Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript

Quality of written English
