Reviewer’s report

Title: Clinical manifestations and anti-TNF alpha therapy of juvenile Behçet’s disease in Taiwan

Version: 0 Date: 22 Jan 2019

Reviewer: Erkan Cüre

Reviewer's report:

Firstly, this study is retrospective and the number of subjects in the study is quite small; however, young behçet patients are examined, therefore, these limitations of the study can be ignored. The study may acceptable for publication.

Major comment:

1. Why etanercept was given for eye and GIS involvement instead of adalimumab or infliximab?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
