Reviewer’s report

Title: Television viewing and child cognition in a longitudinal birth cohort in Singapore: The role of maternal factors

Version: 0 Date: 14 Jun 2019

Reviewer: Josephat Maduabuchi Chinawa

Reviewer's report:

The article title" Television viewing and child cognition in a longitudinal birth cohort: The role of maternal factors" is well written with good statistical analysis and conclusion. This paper should be published in its present form. However the burden and prevalence of Television viewing and child cognition influenced by maternal factors should be well reviewed in the last paragraph of the introduction with justification of the study following.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
