Reviewer's report:

I have reviewed entitled by `Comparison between malignancy- and non-malignancy-associated HLH in terms of clinical features and prognosis in children`.

Revised article is a little improved but not enough to review it.

This article is still required to major revision. I’ve made some changes in a small part of the text, but it should be extensively editing.

I recommend additional statistical review.

There are lots of grammatical errors throughout the text.

It should be extensively edited by professional editing center and the authors should be declared to edit it after revision.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
