Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

Authors addressed most of my comments and the quality of the work is improved. However, the revised version has a lot of typo problems. For example in background section of the abstract:

- breastfeedtheir
- thebenefits
- themother
- samara-logiacity
- assessthe
- withearly
- terminationof

Such problems are common throughout the document. Please critically search such problems and correct them.

Background

It would give complete information to the readers if you include factors affecting EBF in the background section.

Method

Authors include too many independent variables which may cause model overfitting. Ove fitted model can cause the regression coefficient, p-values and R-squared to be misleading.
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
