Title: Neonatal Near-Misses in Ghana: A Prospective, Observational, Multi-Center Study

Version: 0 Date: 16 Sep 2019

Reviewer: Matthews Mathai

Reviewer's report:

I would like to compliment the authors on a well written paper and their work on an important topic in global newborn health. I have only minor suggestions:

1. Please define "major congenital abnormality" and if possible, list the most common types of anomalies seen in these sites.

2. in Table 2, the overarching title of columns 3-5 should be "Indicators among 456 babies for whom survival data for the neonatal period were available"

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
