Reviewer’s report

Title: Real spinal cord injury without radiologic abnormality in pediatric patient with tight filum terminale following minor trauma: a case report

Version: 0 Date: 08 Nov 2019

Reviewer: Ivna Cvitković

Reviewer's report:

Interesting presented idea of very possible correlation. In my opinion requires better definition of OTCS/TCS (based on article from 1993, reference 7; still controversial). Low strength of evidence.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
