Reviewer's report:

Dear Author,

I carefully reviewed the manuscript in the BMC Pediatrics entitled "Hemophagocytic Lymphohistiocytosis resulted from cytokine storm in a child with chronic granuloma disease triggered by septicemia: A Case Report and literature review".

In the section of Case presentation, you noted that this case was the first report of treated HLH associated with CGD and the literatures about this disease were rare. But, similar Case Reports take part in literature and following issues need to add in the section of references.
