Reviewer's report

Title: Neuropsychological and cerebral morphometric aspects of negative symptoms in schizophrenia. Negative symptomatology is associated with specific mnemonic deficits in schizophrenic patients

Version: 5 Date: 11 September 2014

Reviewer: Nicola Dusi

Reviewer's report:

Major revision
none

Minor revision

The article is worthwhile publication with a minor revision that pertains typos and language.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

No conflict of interest
