Reviewer's report

Title: Differentiating ADHD from Oral Language Difficulties in Children: Role of Movements and Effects of Stimulant Medication.

Version: 1 Date: 14 April 2014

Reviewer: Peter M. Wehmeier

Reviewer's report:

This is a well-written paper based on sound clinical research. The findings reported in the paper are important to those with closely related research interests.

Minor essential revisions

In the Abstract, the heading "Results" should be placed one sentence later because the sentence "Those on a stimulant medication ..." belongs to the Methods section.

In Reference #30 (Baker et al.) the word "Dissertation" should be inserted after the word "Doctoral".

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
