Reviewer's report

Title: Optimising plasma levels of clozapine during metabolic interactions: a review and case report with adjunct rifampicin treatment.

Version: 5 Date: 30 January 2015

Reviewer: Manoranjenni Chetty

Reviewer's report:

I support the publication of the paper and have 2 Discretionary revisions:
* Line 328 'moderately rapidly' should be rephrased
* Bullet point 2 in the Conclusion states that clozapine blood levels should be measured weekly during TB therapy - is this feasible? Fortnightly might be more useful since there would be adequate time to evaluate the changes in clozapine concentrations.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
